Medical Education Projects: Educational loan repayment programs are available to potential career missionaries who would otherwise be unable to fulfill their dream of full time service.

Fellowship Grants: The Foundation seeks to encourage future medical missionaries by providing grants to medical students, residents, or fellows interested in gaining clinical experience in the missions setting.

Short Term Projects: The foundation facilitates both group and individual opportunities to serve various mission fields. Group projects have proved valuable to the people served as well as providing:

Spiritual enrichment

Team-building

Family bonding opportunities. One of our projects was assisting with medical missions in areas impacted by Hurricane Katrina.
