Continue the Celebration!

Healthcare and academic innovators, with funding from community leaders who are committed to the future success of southwestern Michigan, have developed one of the newest medical schools in the country. Western Michigan University Homer Stryker M.D. School of Medicine, a state-of-the-art private medical school in downtown Kalamazoo, is now open and celebrating our inaugural class of 2018.

With an innovative curriculum rooted in team-based education, WMU Homer Stryker M.D. School of Medicine – a collaboration of Western Michigan University, Borgess Health, and Bronson Healthcare – will educate and inspire lifelong learners to be exceptional clinicians, leaders, educators, advocates, and researchers of tomorrow.

This is our moment in Kalamazoo’s rich history of life sciences, discovery, healthcare, and biomedical research to shape our community’s future as well as the future of healthcare.

We can’t do it without you.

WMU Homer Stryker M.D. School of Medicine must be financially self-sustaining through private gifts, clinical revenue, tuition, and endowment income. An investment in the medical school helps us realize our mission and achieve our vision to be distinguished as a leader in medical education, patient care, research, and service. Thank you for your consideration of giving and being part of the legacy.

Continue the celebration by becoming a founding donor and an integral part of medical history in southwestern Michigan. Every gift counts. With a gift of $1,000 or more, you’ll be recognized by your name etched on our glass donor wall in the medical school. Give or pledge by December 31, 2014 and you’ll be given added distinction as a founding donor by highlighting your name in gold.

A return envelope and information on ways to give is enclosed. If you have questions or would like to know about other means to contribute to medical education in southwestern Michigan, please feel free to contact our Engagement Manager, Al Shifflett at 269-337-4483 or al.shifflett@med.wmich.edu.

In health and wellness,
